

Seamstresses in the making

Style Studio Fashion Design School and Producera AB/NYPD sponsored 6 mothers from Manggahan, Merville to free sewing skills training; materials, meals and transportation for 7 full day sessions over the course of 7 weeks.

The mothers were carefully chosen by Springboard Foundation and Style Studio. They came from very poor families and we felt that they are the ones who needed the training most because some are single mothers and have no other training. Many mothers applied for these training sessions, sadly only 6 at this time could be chosen. The mothers were really happy and grateful for this wonderful blessing they received.

During the training all the mothers were excited and motivated. They always arrived one hour early ready for their day.

During the training they learned how to make shorts, a blouse and a skirt.

It is with great thanks to Style Studio Fashion Design School and Producera AB/NYPD, that we were privileged to accompany the mothers through their training. Achieving the training from such a prestigious school will make a huge difference to the lives of these mothers. This will greatly increase their chance of employment and one employer has already expressed interest.

Find out more how you can support this initiative by contacting the Springboard Foundation and make the difference!
